

SOUMYA SALIPA DAS

Bangalore | 8018776136 | soumyasalipadas@gmail.com | [GitHub Portfolio](#)

PROFILE SUMMARY

Detail-oriented Computer Science graduate with a strong foundation in SQL, PowerBI, Python, and Excel. Skilled in analyzing data, identifying trends, and presenting insights through dashboards and reports. Currently seeking an opportunity to contribute as an entry-level Data Analyst while continuing to grow professionally.

EDUCATION

- BIJU PATTANAIK UNIVERSITY OF TECHNOLOGY(B.TECH) 2021-2025
- KMBB HSSSC(12TH) 2019-2021

SKILLS

- SQL
- Python (Pandas, NumPy, Matplotlib)
- Tableau/PowerBI
- Excel
- Data Cleaning
- Data Visualization

INTERNSHIP

Data Analytics Intern | QSpiders, Bangalore | (Ongoing)

- Undergoing intensive training in Python (Pandas, NumPy, Matplotlib), SQL, Power BI, Statistics & Machine Learning fundamentals.
- Working on real-world case studies: Retail Sales Dashboard (Power BI), Restaurant Orders Analysis (SQL), Flight Data EDA (Python).
- Building portfolio of 4 end-to-end projects with GitHub documentation and business insights.

Data Analytics Trainee | Central Tool Room & Training Centre , Bhubaneswar | FEB 2025-April 2025

PROJECTS

Supply chain Performance Dashboard | Microsoft Excel

Excel, Pivot Tables, Slicers, Dashboard Design

- Analyzed 100 SKUs supply chain data, built 8 pivot tables tracking Total Revenue ₹5.77L & 46K units sold.
- Created 6 KPIs (Inventory Status, Profit/Loss, Defect Status) and interactive dashboard with slicers for Location & Product Type.

Adidas US Retail Sales Analysis | Power BI, DAX, Power Query

Power BI, DAX Measures, Data Modeling, Filled Map, Donut & Bar Charts

- Analyzed 9,652 rows of Adidas US sales (2020-21), built dashboard with 5 KPIs: Total Sales \$900M, Operating Profit \$332M, Units 2M, Margin 42%.
- Created DAX measures for Operating Margin & Price Per Unit; designed 6 visuals (Sales by Month, State Map, Region, Product, Retailer) with Region & Date slicers.
- Identified West region (30% sales), Men's Street Footwear (\$209M), and West Gear retailer (\$243M) as top performers.

Restaurant Orders Analysis | PostgreSQL, Advanced SQL

Tools: PostgreSQL, pgAdmin, CTEs, Window Functions, RANK(), PARTITION BY

- Analyzed 500 restaurant orders (497 customers) across 3 categories, calculated total revenue ₹20,023 using quantity * price.
- Wrote 20+ queries for data quality checks (duplicates, nulls), sales, customer & time-based analysis using GROUP BY, HAVING, EXTRACT(), Subqueries.
- Applied advanced SQL: RANK() to rank top 5 items by revenue (Pizza ₹2,627, Brownie ₹2,570), CTEs & PARTITION BY to find top item per category.
- Identified key insights: Main category max revenue (₹7,026), Cash most used (132 orders) but Credit Card max revenue (₹5,322), Peak orders 2 PM but peak revenue 8 AM.

Airline Flight Data Analysis | Python (Pandas, Seaborn, Matplotlib)

- Performed EDA on 50K+ flight records, cleaned outliers & nulls, analyzed 8 business questions including price vs airline, class, route, and booking time
- Built 8+ visualizations (barh, catplot, relplot) revealing Business class is 5x Economy and prices spike 40% within 5 days of departure

CERTIFICATES:-

- Data Analytics Certificate ,CTTC
- Google Data Analytics Professional Certificate , 2025
